

# MFC - Mir Fan Club

During 1996, a group of amateur radio operators involved in the communications with the MIR Space Station, decided to join into the "Mir Fan Club". In a very short time over 1200 enthusiasts from all over the world asked to participate, including Cosmonaut Valery Korzun, while leading crew #22. Nowadays MIR is not flying anymore, but here we are again with the same spirit and the same enthusiasm for the ISS, the new International Space Station.

Parlano di noi in prima pagina del sito [ISS FanClub](#) americano !

## ITALIAN M.F.C. Members UPD. 16/May/2000
